Jan Blanchard

May 2016

Control Your Future™

Roadmap – Version 7.4

- ***Planned* deployment**
 - Sunday 6/26/16
- **Release Resources** (weblabs, videos, manuals)
 - Will soon be at <http://learn.pcc.com/updates/>

Control Your Future™

PCC v7.4 Highlights

- **inscoar: show total charges for the visit**
 - HCFA and ECS lines will include total
- **eligibility: verify secondary (medicaid) as well**
 - Patient eligibility screen will have a selector
- **Add visit notes to inscoar output**
 - Billing history will include notes

Control Your Future™

Documentation Q

Q: I found a SNOMED which matches my need but the ICD-10 mapped to it isn't quite right. How can I find a SNOMED which maps to the ICD-10 I really want to bill?

Documentation A

A: You don't. You create a map to meet both documentation and billing needs.

Your Documentation Q's

Q: Do we have to record XYZ at every visit to get "credit"?

A: Record what you think and do and the billing works itself out.

Your Coding Q's (cont'd)

Q: When do I bill 96110 vs. the 96127 for periodic screenings?

A: Depends upon the reason/tool. AAP offers "Standardized Screening/Testing Coding Fact Sheet for Primary Care Pediatricians: Developmental/Behavioral/Emotional"

Your Billing Q's

Q: Do I need modifier X on CPT 12345 to get it paid?

A: Unless a modifier accurately enhances the CPT to better match your record, it's a billing requirement. Get the requirement in writing.

AAP Coding Newsletter

May 2016 Issue

- Mental/Behavioral Health in Medical Home
- Medicaid NCCI Edit Updates

<https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index.html>

- Placement of urinary catheter (51701)

- ICD-10

- Initial, subsequent, sequela guidance
- Coding for feeding problems which began before 29th day
