90832, 90833(+), 90834, 90836(+), 90837, 90838(+)

- Wording is now "w/patient"; deleted "and/or family member". Clarification based on for whom the therapy is intended, **not** who is in attendance.
- Examples added to reinforce the midpoint rule should guide code selection.
- Language change from "Family member" to "informant" in section guidance does not disqualify code use when informant is a family member. Simply broadened to include informants.

Psychotherapy

90846, 90847 - Family psychotherapy

- Time added (50" for each). Establishes that less than 26" should not be reported (midpoint rule)
