Incident To

CMS' Incident To requirements:

- Staff member rendering services must be employed by clinician directing the care
- Clinician (QHCP) must have documented an order for the service rendered
  - No new patients
  - No new problems
- State regulations must include the service in staff member’s scope of practice

AAP Coding Newsletters

Access via PCC EHR or Login to community.pcc.com

April 2019

- Office and Other Outpatient Evaluation and Management: Big Changes May Be Coming
- What Coding Might Look Like Under Centers for Medicare & Medicaid Services 2021 Proposals
- Subspecialty Coding News: Chimeric Antigen Receptor T-cell Therapy
- AAP Honored for Excellence in Coding Education
Evaluation and Management: Potential Changes

CMS’s Goal: **Reduce documentation burden of E&M**
- **Eff 1/1/21**
- A single rate would be paid for codes 99202–99204 and 99212–99214
- Code selection will be based on “medical necessity and any of the following”:
  - Current documentation guidelines (1995 or 1997)
  - Medical decision-making (MDM) only (as described by current guidelines)
  - Typical time (regardless of percent of time spent in counseling and/or coordination of care)

Documentation:
- ...for codes 99202–99204 and 99212–99214 would be the same as that required for code 99202 or 99212 when selecting codes based on current guidelines or MDM alone.
- Level 1 (99201) and level 5 services (99205, 99215) would be selected as required by
  - current guidelines
  - MDM only (see notation in Table 1 about MDM of code 99201)
  **OR**
  - the assigned typical time

HCPCS
- CMS would create HCPCS codes that would be reported in addition to codes 99202–99204 and 99212–99214 when reported for primary care or non-procedural subspecialty services
- The 2 codes are valued equally at approximately $13

Time
- CMS would add a different extended visit code to would be reported when total face-to-face time for 99202–99204 and 99212–99214 is extended but not sufficient for reporting prolonged service
- Payment for the extended service would be approximately $67 (paid in addition to the level 2–4 E/M service provided).
Roadmap - Version 8.9

General Deployment planned:

Sunday, June 2, 2019

Version 8.9 - Appointment Book

- Find appointment slot by visit type
- Find siblings while scheduling appointments
- Streamlined Day View shows only who is working that day

Version 8.9 - Patient Portal

- Templates for patient to request:
  - Appointments
  - Rx Refills
  - Referrals
  - Custom message types
- Attach a document directly to a Portal message
- See attached documents in-line in messages
- Quick access button to "Create a Portal Message"
- See personal balance due for all, even if Privacy is Enabled
Version 8.9

- Updates to latest LOINC, SNOMED, NDC Mapping, and GPCI & RVU code sets
- Support for multiple, simultaneous EHR windows with quick navigation features
- Quickly see the last 5 documents added or updated per patient

Version 8.9 - Reports

- Now feature sub-totals: Deposit
- Ability to report on appointment blocks as well as filter on the Provider's availability

What Billing Questions Do You Have?

How do you handle it when a carrier...?
What do you do when an insurers requires...?
How can I find a better source for...?
Shouldn't our patients be addressing ...?
I have recently succeeded at ...
