**Posting Charges**

- Charted diagnoses and procedures come over from PCC EHR automatically
- Ready for eyeballing by billing staff
- Billers can make edits as needed (i.e. modifiers)
- Saves time and paper!

**Configuration**

- Billable procedures are configured as orders in PCC EHR to populate the encounter form and be sent to billing
- Orders can contain multiple procedures that are often done in the same visit
- Incidental items can be made available for easy selection by clinical staff
Electronic Encounter Form Editor

Have Optional and Incidental Items Available on the EEF

Charted Procedures

- 94614 Evaluate Fit Use of Inhaler
- J9113 Nebulizer Non-Cap Unit
- 94640 Airway Infiltration Treatment

- Insurance plan-specific items
- Modified procedure codes
- Supplies

Increase Charge Capture
**Benefits**

- Streamline the clinical to billing process (No more chicken scratch!)

- Increase charge capture of commonly missed incidental items

- Ensure all billable items have been posted in Partner
To Learn More...
