MEANINGFUL USE AND THE PCC EHR

Simply put, "meaningful use" means that providers need to show they're using certified EHR technology in ways that can be measured significantly in quality and in quantity.

Eligible Professional (EP) in the PCC EHR is anyone who has signing or co-signing rights. They may or may not be an EP under the ARRA program.

There are 15 core measures that all EP's must meet and an additional 10 optional measures from which each EP must select 5 to meet.

The information in this session reviews those measures that have specific EHR reporting requirements and the related documentation and reporting tools in your PCC EHR.

**Recording Demographics
PCC Measure III – CMS Core Measure 7**

Percentile: >50%

Denominator

Number of *unique* patients seen by the EP during the reporting period.

Numerator

Number of patients who have all the elements of the demographics and/or have specific exclusions, either due to patient refusal or the requirement is contrary to State law.

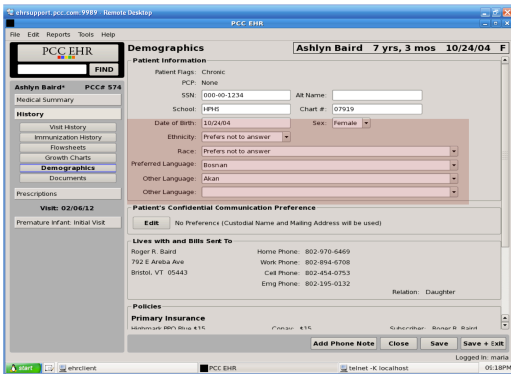

Meeting the Measure

It is an all or nothing situation – all questions must be answered. Preferred language, gender, race, ethnicity and date of birth. The answer may be "prefers not to answer" for some. The responses in the pull-down menus are the required responses that are used in the US Census. The language drop down list remembers the top ten answers.

**Maintain Up-to-Date Problem List
PCC Measure IV – CMS Core Measure 3**

Percentile: >80%

Denominator

Number of *unique* patients seen during the reporting period by the EP.

Numerator

Number of the unique patients seen during the reporting period who have at least one entry or an indication that there are no known problems.

Meeting the Measure

The patient problem list must have at least one active problem or have the status of "No Known Problems". This does not populate automatically. It must be selected from the drop down menu.

Note: If all items on the problem list have been resolved, the EP must select "No Known Problems".

**Maintain Active Medication Allergy List
PCC Measure VI – CMS Measure 6**

Percentile: >80%

Denominator

Number of *unique* patients seen during the reporting period by the EP.

Numerator

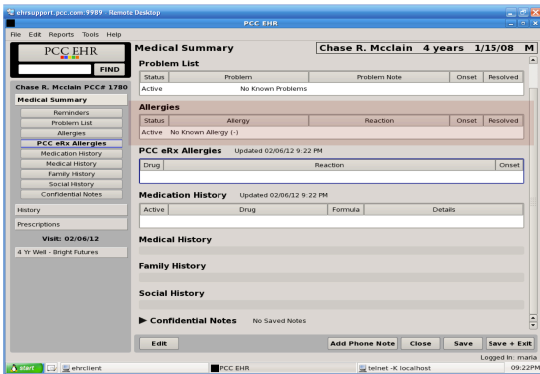

Number of the unique patients seen during the reporting period that have at least one entry or an indication that the patient has no known medication allergies.

Meeting the Measure

To meet the measure a prescription allergy needs to be entered into DrFirst or the status *No Known Drug Allergies (NKDA). The status will not come across automatically from DrFirst unless it happens be coupled with another change that will update the Medication List. Checking off any one of the 'reviewed' options (Allergies Reviewed, Medications Reviewed, Problems Reviewed) will generate the update.

**Record and Chart Changes in Vital Signs
PCC Measure VII – CMS Core Measure 8**

Percentile: >50%

Denominator

Number of *unique* patients age 2 or over seen during the reporting period by the EP.

Numerator

Number of the unique patients over the age of two who have at least one entry of height, weight, blood pressure and BMI recorded in the EHR.

Meeting the Measure

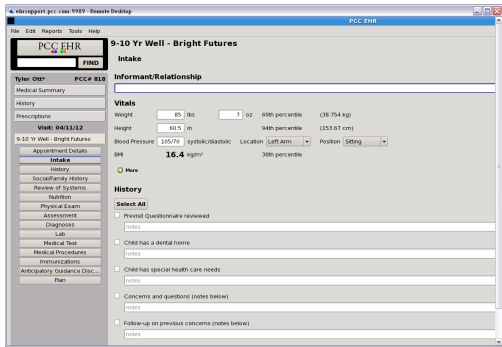

To meet the measure each patient must have all four pieces of information entered. All four do not have to be in the same visit. The measure will look back to previous visits to gather vital information even if the visit is not within the selected reporting period. But please note that, in order to have a calculated BMI, there has to be at least one visit with both height and weight recorded together.

Exclusions

Any EP who either sees no patients 2 years or older, or who believes that all three vital signs of height, weight, and blood pressure of their patients have no relevance to their scope of practice.

Record Smoking Status PCC Measure VIII – CMS Core Measure 9

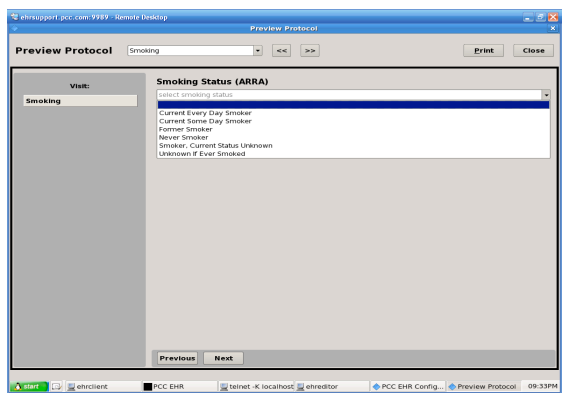

Percentile >50%

Denominator
Number of *unique* patients age 13 or older seen during the reporting period by the EP.

Numerator
Number of patients with the smoking status recorded as structured data.

Meeting the Measure
The smoking status can only be recorded if the "Smoking Status (ARRA)" component is used. The component cannot be edited. It can be added as an anchor. The responses in the drop down menu are mandated by CMS and use the CDC standardized responses. If a patient turns 13 and the smoking status is not noted, it will effectively reduce the percentile for the practice. To meet the measure the smoking status needs to be noted only once and will continue to meet the standard in subsequent reporting periods.

Exclusions
Any EP who sees no patients 13 years or older.

Electronic Access
PCC Measure IX - CMS Optional Measure 5

Percentile: >10%

Denominator

Number of *unique* patients seen during the reporting period by the EP.

Numerator

Number of patients who have timely (available to the patient within four business days of being updated in the certified EHR technology) electronic access to the health information on line.

Meeting the Measure

At present, it is not possible to qualify for this measure. PCC's Patient Portal is in Beta testing.

Provide Clinical Summaries to Patients for Each Visit
PCC Measure X - CMS Core Measure 13

Percentile: >50%

Denominator

Number of *unique* patients seen during the reporting period by the EP.

Numerator

Number of patients who are provided a clinical summary for their visits within three business days of the date of service.

Meeting the Measure

Measurement uses the following criteria: (1) was the patient visit summary generated and either printed or saved as PDF and (2) was the visit signed. The visit need not be signed prior to generating the summary; however, it must be signed to qualify in the numerator.

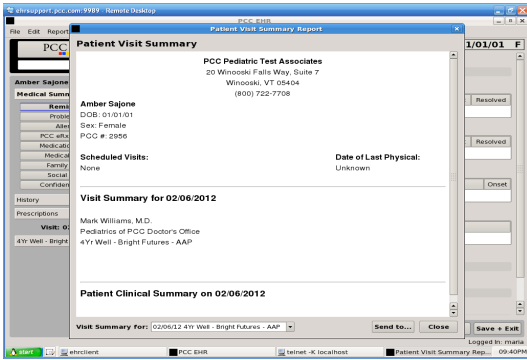

Each visit that is signed or con-signed by the provider requires a visit summary to be generated.

Exclusions

Any EP who has no office visits during the EHR reporting period.

**Provide Summary of Care Record for Transition of Care.
PCC Measure XVI – CMS Optional Measure 8**

Percentile: >50%

Denominator
Number of transitions of care and referrals during the EHR reporting period for which the EP was the transferring or referring provider.

Numerator
Number of transitions of care and referrals where a summary of care record was provided.

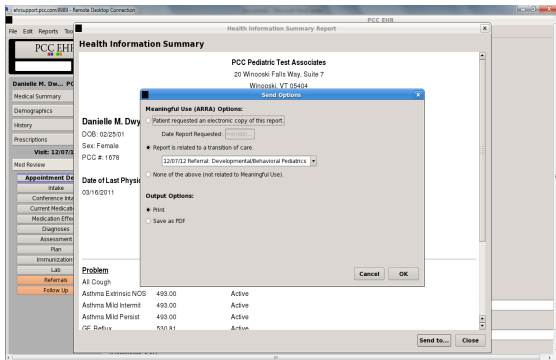

Meeting the Measure
The measure is calculated in one of two ways:
 1. **Transition of Care:** From the reports menu select the Health Information Summary, select Send and you will be given an opportunity to select the Other transition of care. It will put in both the denominator and numerator. The EHR will then see who signed the visit.
 2. **Referral:** Whenever a referral is ordered for a patient the referral will be placed in the denominator. This is based on referrals, not patients. For example if a provider has four referrals, but only generated a health information summary for two, the performance ratio would be 50%.
 Note: The referral needs to have been ordered by using the referral component and be included in a signed visit.

Exclusions
An EP who neither transfers a patient to another setting nor refers a patient to another provider during the reporting period.

Patient Populations

- **Initial Patient Population** – Base patient population (this group does not show on CQM reports in PCC EHR).
- **Eligible Instances** – The total number of patients being counted on the report. This is your denominator.
- **Meets Performance** – This is your numerator.
- **Performance Exclusions** – These patients are added to your 'meets performance population' when the report calculates your performance percentage. Not all reports have exclusions.
- **Performance Not Met Instances** – The patients listed in this population are counting against your performance percentage.

Adult Weight Screening and Follow-up (A QFT 0421) - Core Report			
Percentage of patients aged 18 years and older with calculated BMI in the past six months or during the current visit documented in the medical record in 90% of the most recent BMI in medical system over a follow-up plus document period. This report looks at the patient population: patients 65 years and older and patients 18-64 years old.			
Initial Patient Population	Patients 65 years old or older or patients 18-64 years old	Meets the Measure in PCC EHR	Add Adult Weight Screening and Follow-up (A QFT) icon present in PCC EHR. The BMI in this population cannot be calculated when a patient has no recorded BMI code for follow-up plus and encounter outpatient or ICD
Eligible Instances	All patients in the initial patient population who had an encounter outpatient during the encounter plus period	Denominator Qualifiers: CPT Codes for Outpatient Encounter	99211-99212, 99213-99214, 99215, 99216-99217, 99218-99219, 99220, 99221, 99222, 99223, 99224-99225, 99226-99227, 99228-99229, 99230, 99231, 99232, 99233, 99234, 99235, 99236, 99237, 99238, 99239, 99240, 99241, 99242, 99243, 99244, 99245, 99246, 99247, 99248, 99249, 99250
Performance Exclusions	Patients with a current illness, diagnosis procedure or lab test, physical exam was not completed for a patient or medical record recorded 4 months before or six months in the encounter outpatient.	Key qualifier Qualifiers: ICD-10 Codes, ICD-9-CM Codes, ICD-10-CM Codes	Population 65 years & older BMI < 22 to 28 Population 18 to 64 years BMI < 18 to 25 For BMI outside of diagnosed range the follow-up must be charted during the visit N 95.3 or 4344-5, 4377-4, 5342-4, 5384, 5391, 5392, 5907
Meets Performance	Patients 18-64 years with BMI between 18.5 and 25 occurring 4 months before or six months in the encounter outpatient. Patients with BMI 65 years or older 18.5 will have a follow-up plus document.	Exclusions: Progression Codes Program or Intervention ICD-10 Codes, ICD-9-CM Codes	Progression Codes: 930-931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949,
