PCC Resources For PCMH

Tim Proctor (tim@pcc.com)

Users Conference 2018

Agenda

- Current state of PCMH
- Exploration of how PCC functionality applies to new 2017 PCMH factors
- PCC Resources for PCMH

Takeaways

- A basic understanding of NCQA's PCMH Recognition and why it might benefit your practice
- An understanding of how PCC reports and functionality can be used to meet specific PCMH requirements
- Recognition of how your existing workflow and processes may need to change in order to meet PCMH requirements

Current State of PCMH

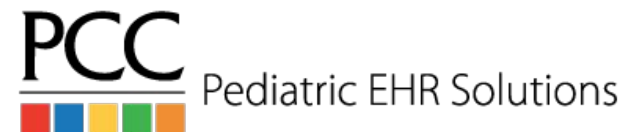
- Focus on improving **patient access**
- Emphasis on **team-based care**
- Consistent **population management** of patients
- **Care management** focus on high-need populations
- **Coordinating care** and **transitions**
- Integration of **behavioral health**
- Aligns with **Meaningful Use** and use of **I/T**
- Alignment of **quality improvement** activities

Why NCQA PCMH?

- Most widely adopted model for transforming primary care practices to medical homes
- May be financially worthwhile depending on region and payor mix
- Streamlined workflow and operations

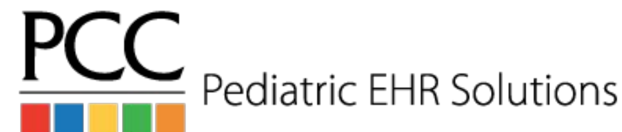
NCQA PCMH Growth

- As of July 2013, ~6,700 sites and ~34,000 clinicians with PCMH recognition
- As of July 2017, >12,200 sites and ~58,000 clinicians recognized in 50 states
- At least 40 **PCC practices** have PCMH recognition and another 24 are in the process of getting recognition



New 2017 Standards

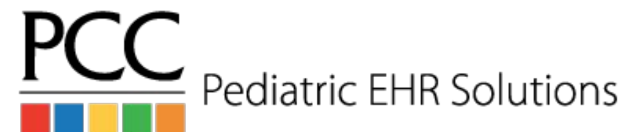
- More flexibility with core requirements and the choice of other elective requirements
- Simplified reporting with less paperwork means less time and cost for transformation
- New digital platform
- Includes virtual review with NCQA staff dedicated to your practice
- No more renewals every 3 years. Will now require **annual** check-in from NCQA with some reporting



New 2017 Standards

Six PCMH Concepts

- Team-Based Care and Practice Organization (TC)
- Knowing and Managing Your Patients (KM)
- Patient-Centered Access and Continuity (AC)
- Care Management and Support (CM)
- Care Coordination and Care Transitions (CC)
- Performance Measurement and Quality Improvement (QI)



Getting Started With PCMH Recognition

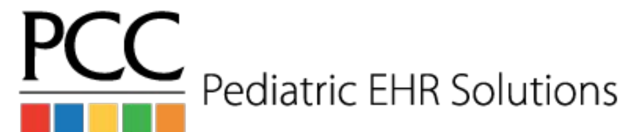
- Visit NCQA's "Getting Started" Resources
- Visit practices who are already medical homes. Share strategies and experiences
- Resource Directory of Incentives for NCQA Clinical Recognition
- Patient-Centered Primary Care Collaborative

UC Denver 2018

PCC Pediatric EHR Solutions

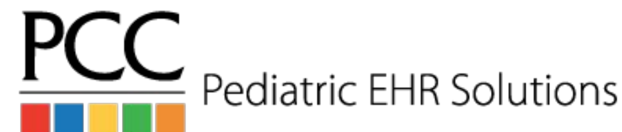
Getting Started With PCMH Recognition

- Single site or multi-site?
  - If 3 or more locations, need special multi-site approval from NCQA
- Consider working with PCC and the Verden Group's Patient-Centered Solutions (PCS)
  - Gap analysis survey
  - Project management
  - Document review



PCC Prevalidation

- You can attest for automatic credit just for using PCC software
- PCC is prevalidated under 2017 standards
    - Fully meets 2 elective criteria - 4 credits
    - Partially meets 2 core criteria
    - Partially meets 1 elective criteria



Are You Renewing Recognition?

If you have 2011 Recognition (any level) or 2014 Level 1 or 2 Recognition:

- Earn recognition at an accelerated pace
- For some criteria, you won't need to provide required evidence
- Review NCQA's Accelerated Renewal Table

Are You Renewing Recognition?

If you have 2014 level 3 recognition, **transition** to the new redesigned process:

- Bypass submission of evidence and skip directly to the **annual reporting** part of recognition
- Enroll in NCQA's new QPASS system
- Annual reporting begins 30 days prior to expiration of current recognition

PCC's PCMH Resources
(http://pcmh.pcc.com)

PCMH Reporting Examples

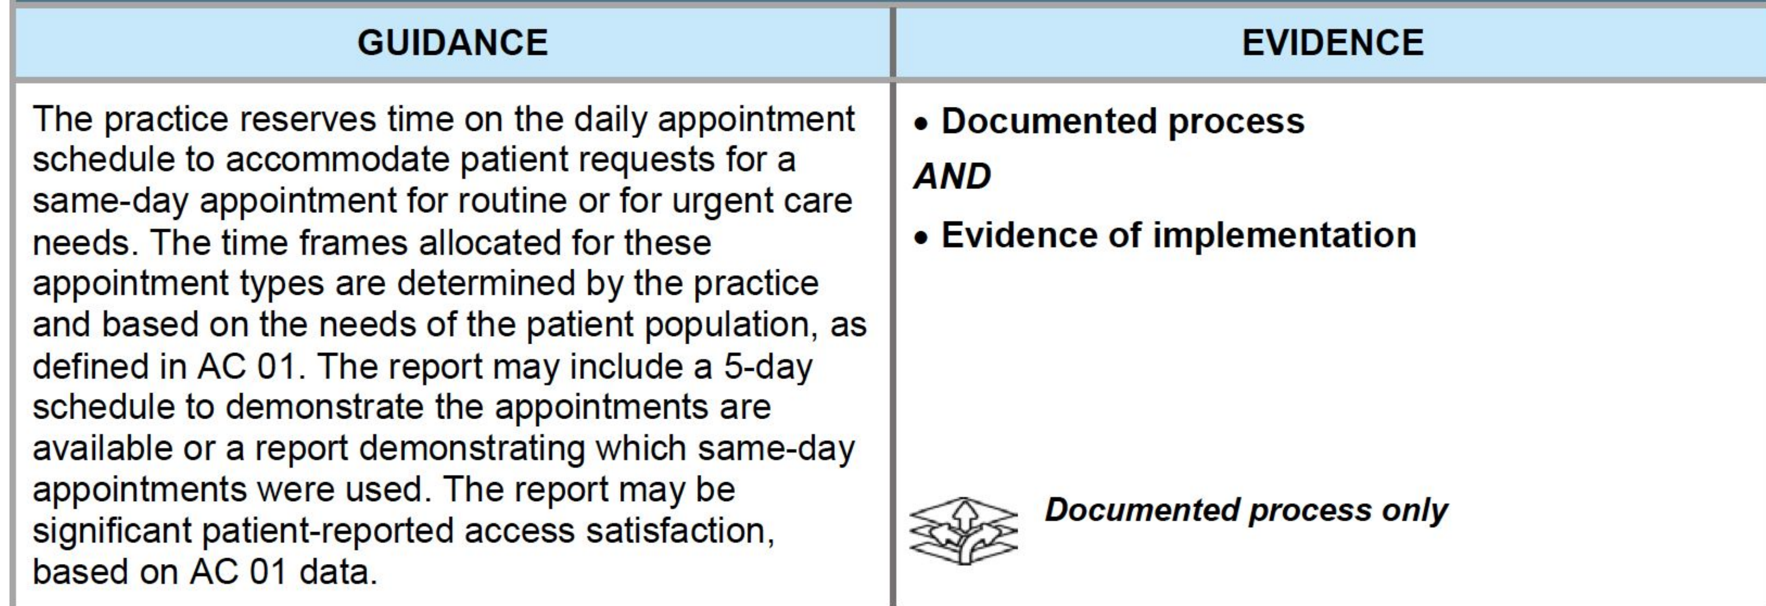
Patient-Centered Access and Continuity (AC)

Patients/families/caregivers have **24/7 access to clinical advice** and appropriate care facilitated by their **designated clinician/care team** and supported by access to their medical record. The practice considers the **needs and preferences of the patient population** when establishing and updating standards for access.

UC Denver 2018

PCC Pediatric EHR Solutions

Same-day Appointments



AC 02 (Core): Provides same-day appointments for routine and urgent care to meet identified patient needs.	
GUIDANCE	**EVIDENCE**
The practice reserves time on the daily appointment schedule to accommodate patient requests for a same-day appointment for routine or for urgent care needs. The time frames allocated for these appointment types are determined by the practice and based on the needs of the patient population, as defined in AC 01. The report may include a 5-day schedule to demonstrate the appointments are available or a report demonstrating which same-day appointments were used. The report may be significant patient-reported access satisfaction, based on AC 01 data.	• **Documented process** ***AND*** • **Evidence of implementation** ***Documented process only***

- Use PCC reports to show that you use same-day sick blocks
- Renewals: documentation and evidence is required

Providing Same-Day Appointments

Davids

Day view of schedule. Times with "Same Day Blocks" are reserved for sick appointments to be scheduled when that day arrives.

Dr. Davidson
Fri Mar 22, 2013

Time	Appointment	Code	Length
8:30a			15
8:45a			15
9:00a	Same Day Block	B15	
9:15a	Same Day Block	B15

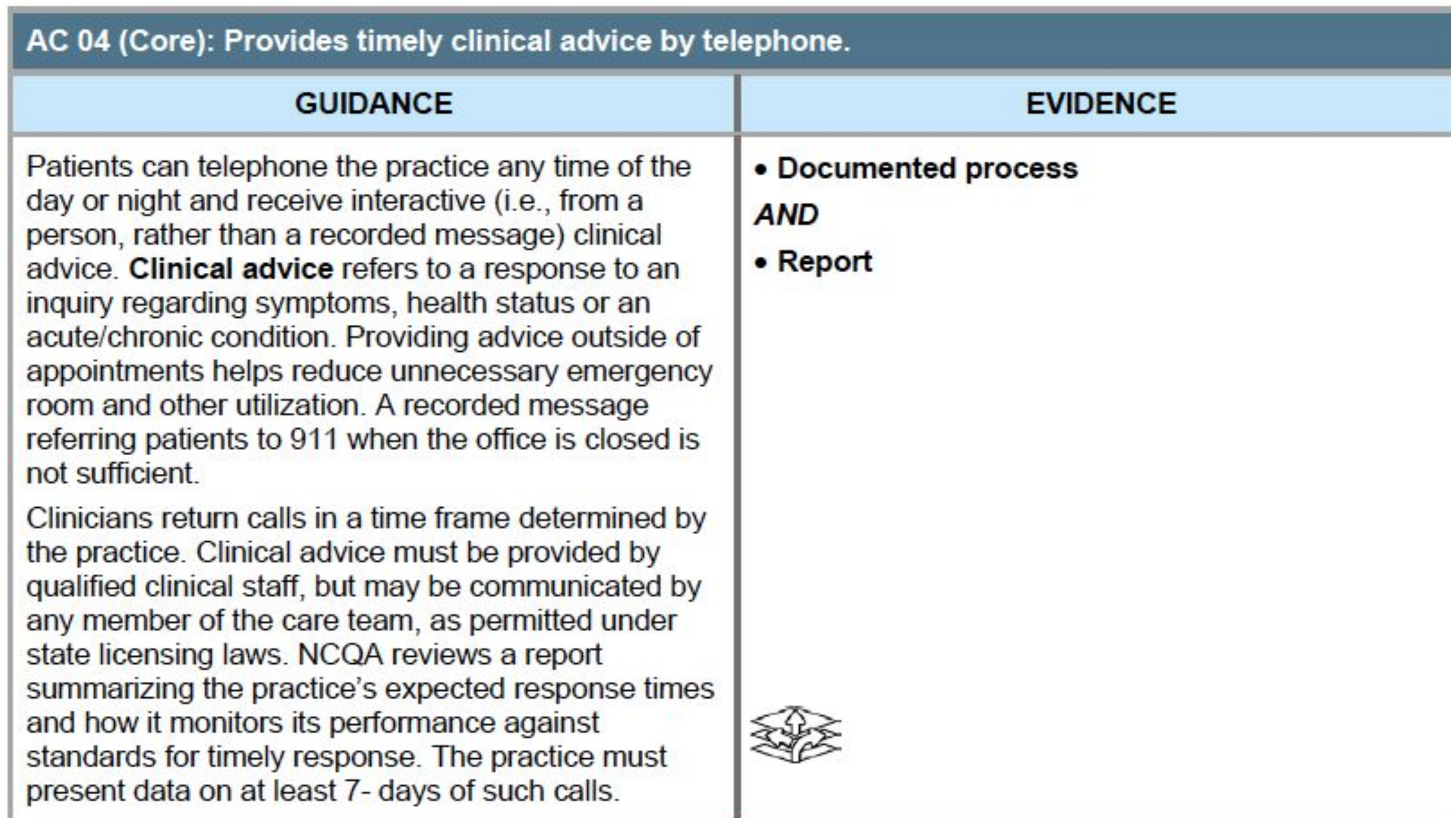
PCC Pediatric EHR Solutions

Timely Clinical Advice By Telephone



AC 04 (Core): Provides timely clinical advice by telephone.	
GUIDANCE	**EVIDENCE**
Patients can telephone the practice any time of the day or night and receive interactive (i.e., from a person, rather than a recorded message) clinical advice. **Clinical advice** refers to a response to an inquiry regarding symptoms, health status or an acute/chronic condition. Providing advice outside of appointments helps reduce unnecessary emergency room and other utilization. A recorded message referring patients to 911 when the office is closed is not sufficient. Clinicians return calls in a time frame determined by the practice. Clinical advice must be provided by qualified clinical staff, but may be communicated by any member of the care team, as permitted under state licensing laws. NCQA reviews a report summarizing the practice's expected response times and how it monitors its performance against standards for timely response. The practice must present data on at least 7- days of such calls.	• **Documented process** ***AND*** • **Report**

- Show that you are tracking response times to phone calls
- Renewals: No documentation or evidence required

UC Denver 2018

PCC Pediatric EHR Solutions

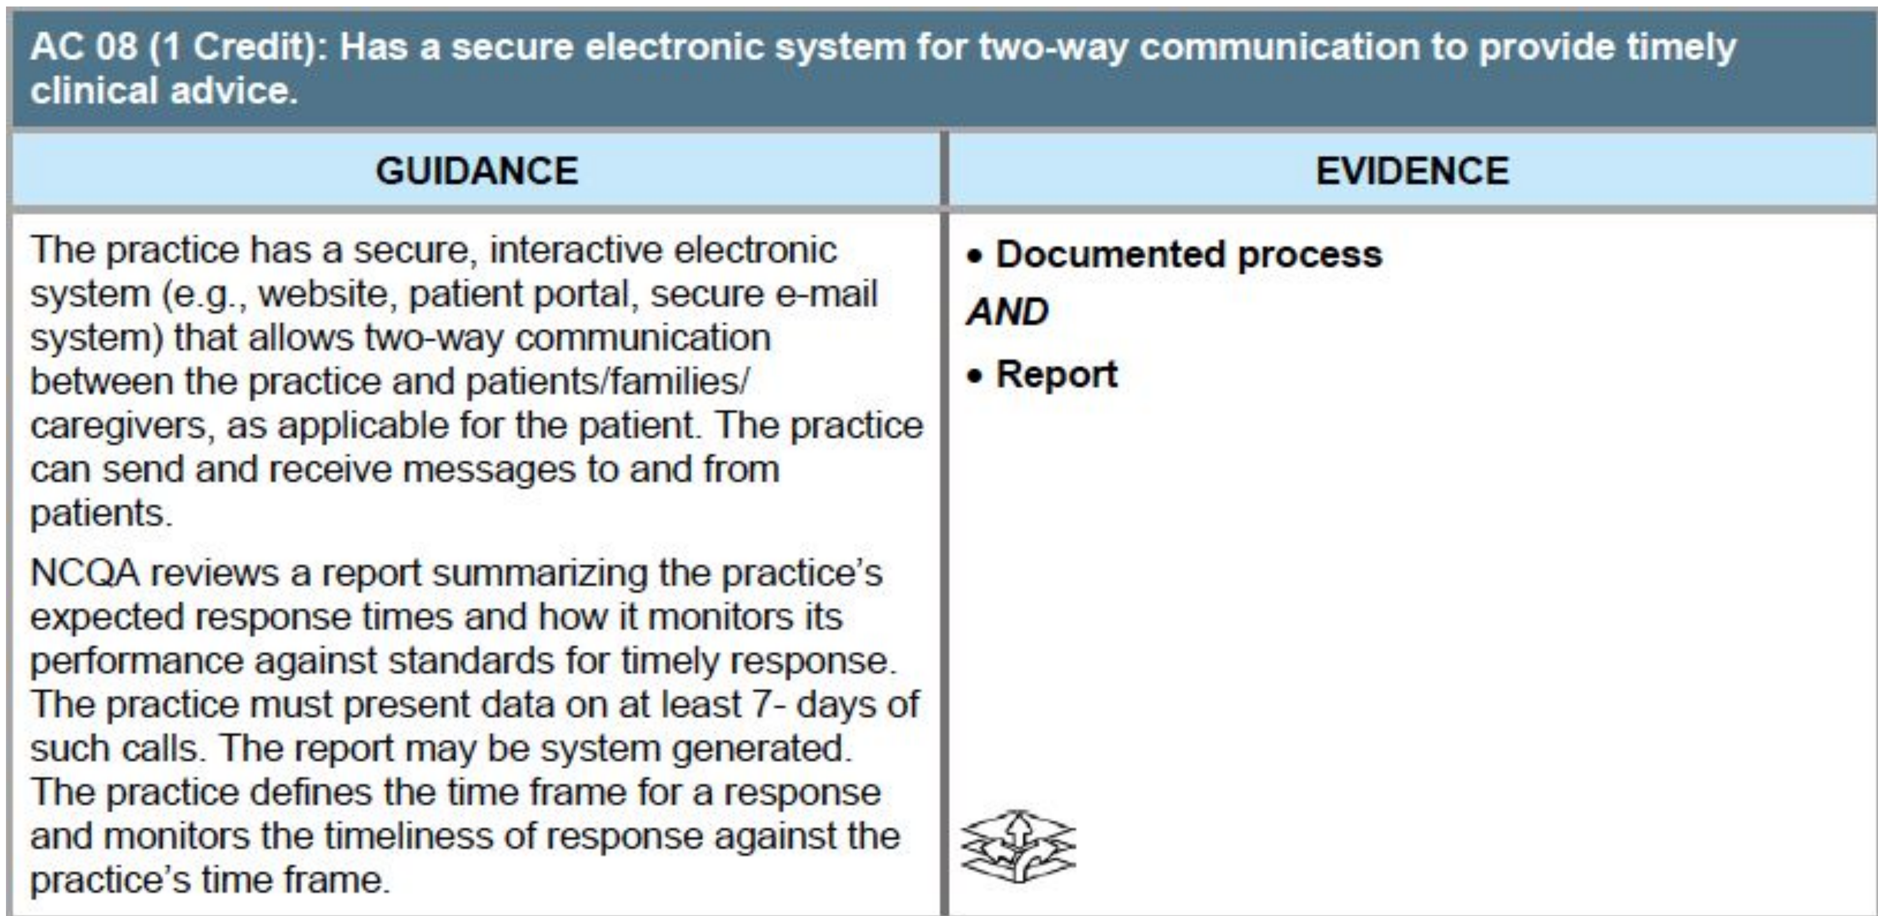
Use Portal For Patient Requests

AC 07 (1 Credit): Has a secure electronic system for patient to request appointments, prescription refills, referrals and test results.	
GUIDANCE	**EVIDENCE**
Patients can use a secure electronic system (e.g., website, patient portal) to request appointments, prescription refills, referrals and test results. The practice must demonstrate at least two functionalities.	• **Evidence of implementation**

- Use secure portal messaging to allow patients to make these requests
- Need to demonstrate only two functionalities
- Renewals: No documentation or evidence required

Timely Clinical Advice By Secure Electronic Msg



AC 08 (1 Credit): Has a secure electronic system for two-way communication to provide timely clinical advice.	
GUIDANCE	**EVIDENCE**
The practice has a secure, interactive electronic system (e.g., website, patient portal, secure e-mail system) that allows two-way communication between the practice and patients/families/ caregivers, as applicable for the patient. The practice can send and receive messages to and from patients. NCQA reviews a report summarizing the practice's expected response times and how it monitors its performance against standards for timely response. The practice must present data on at least 7- days of such calls. The report may be system generated. The practice defines the time frame for a response and monitors the timeliness of response against the practice's time frame.	• **Documented process** ***AND*** • **Report**

- Renewals: No documentation or evidence required

PCC Pediatric EHR Solutions

Use PCC's Patient Portal Functionality

Report Library

Report Name	Description
Patients Linked to a Portal User	List of patients linked to a portal user.
Portal Activity for Patient	Find portal activity for a specific patient.
Portal Activity for Portal User	Find the portal activity for a specific portal user.
Portal Message Response Time	Time between the receipt of a portal message and the response.
Portal User List	List of portal users including creation date and date of last activity.
Portal Users By Appointment Date	List of appointments and associated patients and portal users.
Portal Users Linked to a Patient	Find all portal users linked to a patient. This report can be used to determine who has records.

- Use this new report to track response time to portal messages before and after hours
- Report for at least 7 calendar days

Knowing and Managing Your Patients (KM)

The practice **captures and analyzes information** about the patients and community it serves and uses the information to **deliver evidence-based care** that supports population needs and provision of **culturally and linguistically appropriate services**

Documenting Up-to-Date Problem List

KM 01 (Core) - Documents an up-to-date problem list for each patient with current and active diagnoses

- Use PCC MU Report "Stage 1 - Problem List"
- No required % threshold
- Renewals: No documentation or evidence required

Adolescent Depression Screening

KM 03 (Core) - Conducts depression screenings for adults and adolescents using a standardized tool

- Use PCC's CQM report - "Screening for Clinical Depression and Follow-Up Plan"
- No % threshold is required
- Must identify standardized screening tool
- Evidence and report or documented process required

Assess Oral Health Needs

KM 05 (1 Credit) - Assesses oral health needs and provides necessary services based on evidence-based guidelines or coordinates with oral health partners

- Incorporate oral health assessment into protocols
- Consider doing fluoride varnish
- Document referrals to oral health partners
- Evidence and documented process required

UC Denver 2018

PCC Pediatric EHR Solutions

Assess Oral Health Needs

Measure: Fluoride Varnish Rate

Choose a measure

Dashboard reports updated as of 7/2/2017

Your Score: 0 out of 100

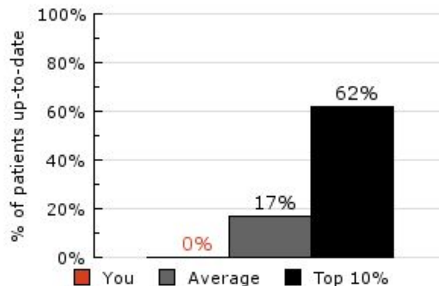
The AAP's Bright Futures Guidelines recommend the application of fluoride varnish to all children every 3-6 months once teeth are present through age 5. For active patients 1-5 years old with a well visit in the past year, this measure tracks how many of those patients also had a recommended fluoride varnish application billed with CPT code 99188, D1206, or 99429 within the last year. See how you measure up to other PCC clients and also see a breakdown of your performance by age and insurance group.

You have **779** active patients between 1 year and 5 years of age who have had a well visit in the past year.

0 of these patients received a fluoride varnish application within the past year.

How You Compare

View Age and Insurance Breakdown



Your Practice	PCC Client Average	Top Performers
0%	17%	62%

(% of active patients 1-5 years old having recent fluoride varnish)

Monitor Fluoride Varnish Rate in Dashboard

Evaluate Patient Communication Preferences

KM 08 (1 Credit) - Evaluates patient population demographics/communication preferences/health literacy to tailor development and distribution of patient materials

- Report and evidence of implementation required
- Use PCC report showing total patients for each communication preference (text, email, cell, etc)

Evaluate Patient Communication Preferences

Total Active Patient Breakdown by Communication Preference	
Filter	
Method	
Cell Phone	1358
Email	487
Home Phone	607
No Preference	706
Text	570
Work Phone	5
Total Result	**3733**

- Spreadsheet output based on custom recaller report showing primary communication preference for each patient
- Coming Soon! Use EHR Patient Lists for this

UC Denver 2018

PCC Pediatric EHR Solutions

Assess Diversity of Population

KM 09 (Core) - Assess the diversity (race, ethnicity, and one other aspect)

KM 10 (Core) - Assess the language needs

- Use EHR Report Library Reports
  - Patient Count and Percentage by Ethnicity
  - Patient Count and Percentage by Race
  - Patient Count and Percentage by Sex
  - Patient Count and Percentage by Primary Preferred Language
- Renewals: Report required

Identify Populations and Recall

KM 12 (Core): Proactively and routinely identifies populations of patients and reminds them, or their families/caregivers about needed services (must report at least three categories):

A. Preventive care services.

B. Immunizations.

C. Chronic or acute care services.

D. Patients not recently seen by the practice.

- Identify patients in need of care (Dashboard, recaller, MU report detail, **EHR Patient Lists**)
- Remind patients of needed services (notify, recaller)
- Report and outreach materials required

KM 12.A: Choosing Preventive Care Services

- PCC Dashboard:
  - Patients overdue for well visits (pick an age group to focus on)
- PCC recaller and Coming Soon! EHR Patient Lists
  - Adolescents needing depression screening
  - Infants needing developmental screening
  - 4-5 year olds needing vision or hearing screening
  - Newborns needing hearing screening
  - Patients recently discharged from the hospital/ER needing follow up
  - Children overdue for tobacco and/or alcohol/substance abuse counseling

Measure: Well Visit Rates - Patients 12-21 Years

Choose a measure

Dashboard reports updated as of 3/31/2014

Your Score: **65** out of 100

This measure shows the percentage of all active patients who are currently between the ages of 12 years and 21 years who have received at least one well visit in the past year. Active patients are those that have been seen at least once (for any visit) in the past three years, and do not have a flag indicating they are inactive.

You have **4,636** active patients between the ages of 12 years and 21 years.

1,568 of these patients are overdue for their well visit. ← **Click for a list of overdue patients**

- Report well visit rates, overdue listing and trends for kids under 15 months, 15-36mos, 3-6yrs, 7-11yrs, or 12-18yrs.

Recaller Overdue Lists

```
                     Recaller - Report Details
  Criteria:
    Build a list of patients based on the following criteria:
    Exclude by Flag - Account Flag
and Exclude by Flag - Patient Flag
and Include by Age
and Exclude by Procedure (All Providers)

Selections:

   Exclude by Flag -  Match any ONE Account Flag
    Deceased                             Dismissed
    INACTIVE                             Transient

   Exclude by Flag -  Match any ONE Patient Flag
    INACTIVE                             Out of Practice
    TWINS

   Include by Age
    between 2 yrs and 3 yrs
    calculated from today

   Exclude by Procedure (All Providers)
    in the past 2 yrs
    calculated from today
    procedures:
      96110    Developmental Screening   96110-EP Developmental Screening-
      96110-HA Developmental Screening-
```

Exclude patients with flags indicating they aren't active

Include patients who turned 2 yrs old in the past year

Select relevant developmental screen codes. Patients who already received a screening will be excluded from report

- Use PCC's recaller to generate lists of overdue patients
- Restrict by procedure or Dx code to focus on patients having certain CPT codes billed or having certain conditions
- EHR Patient Lists will also allow restriction based on **orders** (screenings, tests, etc)

KM 12.B: Choosing Immunization Services

Measure: Immunization Rates - HPV

Choose a measure

Dashboard reports updated as of 6/7/2015

Your Score: **36** out of 100

The CDC's Advisory Committee on Immunization Practices (ACIP) recommends a series of three HPV vaccines for both males and females beginning at age 11 or 12. This measure tracks your HPV vaccination rates for all patients 13-17 years of age, showing the percentage of these patients who have received three HPV vaccines by the time of data collection. See how you measure up to other PCC clients and view a list of patients who have not received all three recommended HPV doses. View the Age and Sex Breakdown report to compare HPV vaccination rates for two age ranges, males and females, and to exclude patients with a current insurance of Medicaid.

You have **2,665** active patients between 13 years and 17 years of age.

2,049 of these patients are due for at least one HPV vaccine.

ADD/ADHD Patient Followup

Choose a different measure

Your Score: **86** out of 100

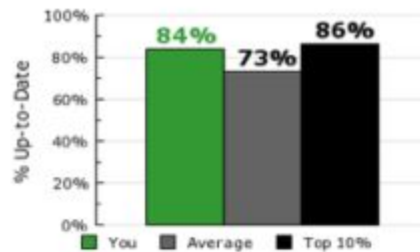
Dashboard reports updated as of 11/30/2013

This clinical benchmark is a measure of your success with chronic disease management of ADD/ADHD patients. Various clinical resources, from the AAP to various state laws, indicate that actively managed ADD and ADHD patients must be seen by your practice at least once every six months, at least. This section includes a count of your active ADD and ADHD population, an indication of how many of your active patients have this diagnosis, and how many of these patients are up-to-date on their routine followup visit. You can also view a listing of ADD and ADHD patients who are overdue for a followup visit.

Your office has **393** active ADD/ADHD patients. (**4%** of total active patients)

64 of these patients are overdue for a followup visit.

How You Compare



Your Practice	PCC Client Average	Top Performers
84%	73%	86%

(% of ADD/ADHD patients up-to-date on their followup visit)

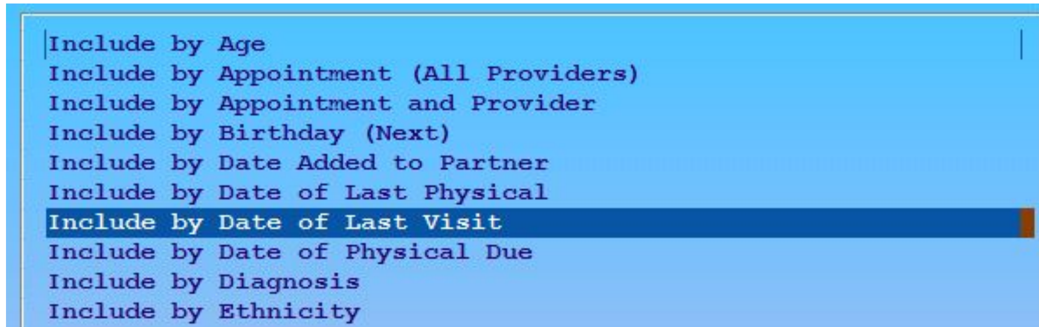
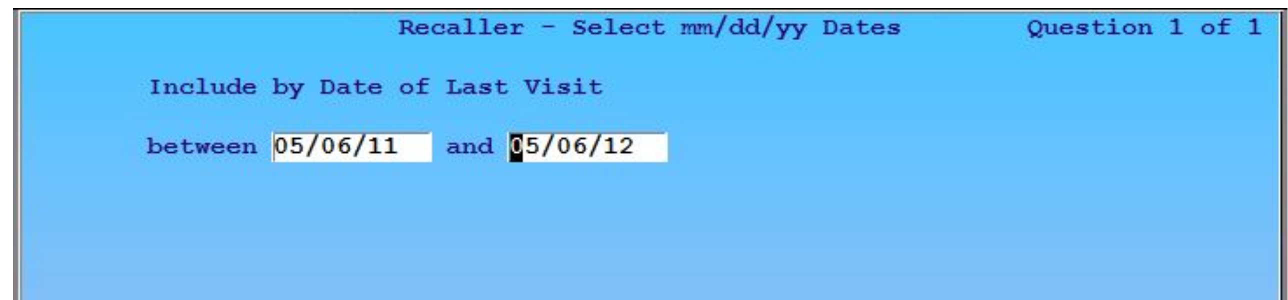
KM 12.D: Patients Not Recently Seen

Use recaller or new EHR Patient Lists restricting by "Date of last visit"





Addressing Medication Safety and Adherence

KM 14 (Core) - Reviews and reconciles meds for more than 80% of patients received from care transitions

- Use PCC's Modified Stage 2 "Medication Reconciliation" MU report
- Renewals: No report required

Medication Reconciliation

Use special component in EHR to indicate medications are reconciled for patients transitioning to you

Transition of Care (ARRA)

- [x] Patient transitioned to my care from another clinical setting
- [x] Medication Reconciliation performed

Addressing Medication Safety and Adherence

KM 15 (Core) - Maintains an up-to-date list of medications for more than 80% of patients

- Use PCC's Stage 1 "Medication List" MU report
- Renewals: No report required

Implement Evidence-Based Decision Support

KM 20 (Core): Implements clinical decision support following evidence-based guidelines for care of (Practice must demonstrate at least four criteria):

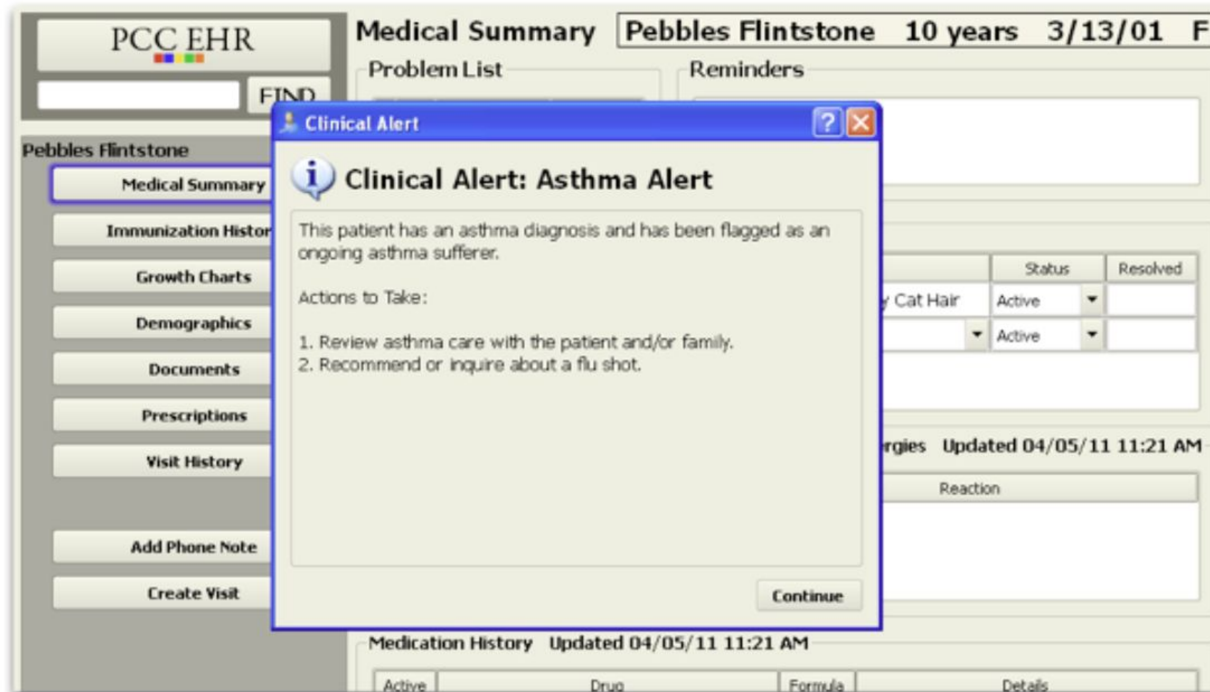
A. Mental health condition.
B. Substance use disorder.
C. A chronic medical condition.
D. An acute condition.
E. A condition related to unhealthy behaviors.
F. Well child or adult care.
G. Overuse/appropriateness issues.

- Demonstrate at least four of the seven criteria
- Identify conditions, source of guidelines, and evidence of implementation

Implement Evidence-Based Decision Support

- PCC has autocredit for the following conditions (if using specified protocols):
  - ADHD for KM20.A (related to mental health condition) if using built-in protocol following AAP's Clinical Practice Guidelines
  - Well Child Care for KM20.F if using Bright Futures protocols
- Consider using Pediatric Obesity for KM20.E (related to unhealthy behaviors)
- Consider asthma, otitis media, or allergic rhinitis for KM20.C or KM20.D (related to chronic or acute condition)

Implement Evidence-Based Decision Support



- Use Clinical Alerts for point-of-care reminders

UC Denver 2018

PCC Pediatric EHR Solutions

Care Management and Support

CM 01 (Core): Considers the following when establishing a systematic process and criteria for identifying patients who may benefit from care management (practice must include at least three in its criteria):

A. Behavioral health conditions.
B. High cost/high utilization.
C. Poorly controlled or complex conditions.
D. Social determinants of health.
E. Referrals by outside organizations (e.g., insurers, health system, ACO), practice staff, patient/family/caregiver.

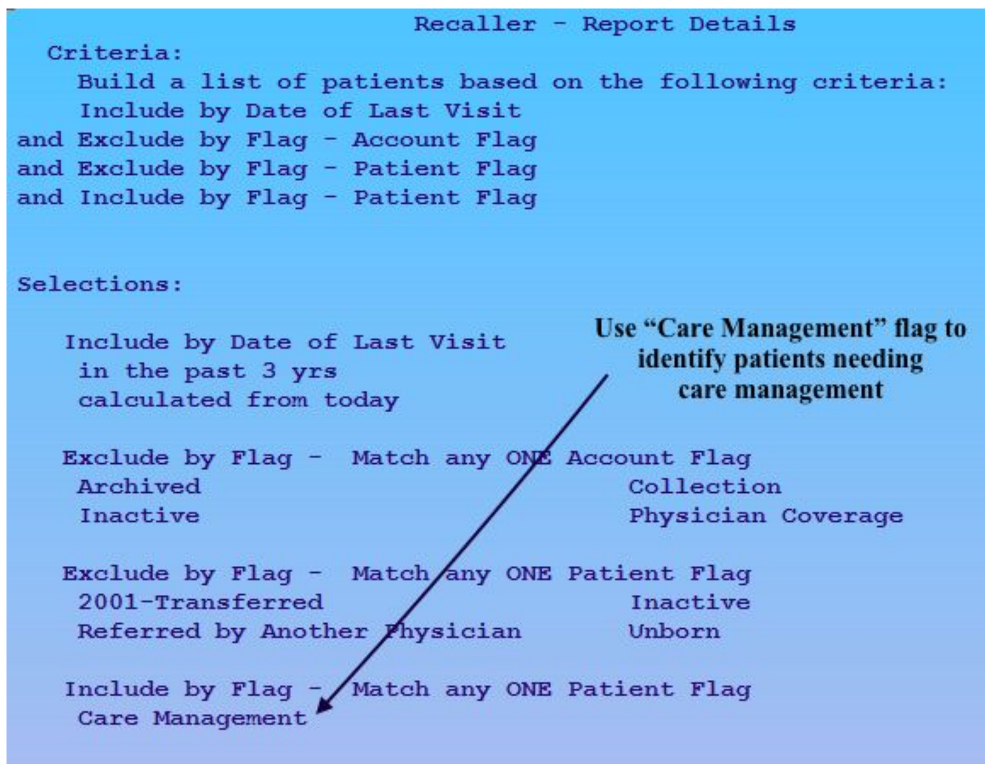
- Include at least three of the five criteria
- Provide protocol for identifying patients for care management

Care Management and Support

- Use recaller or new EHR Patient Lists for identifying patients needing Care Management based on diagnosis or problem list
- Add "Care Management" flag to these patients
- Create clinical alerts reminding clinicians when working with these patients

Care Management and Support

CM 02 (Core): Monitors the percentage of the total patient population identified through its process and criteria.



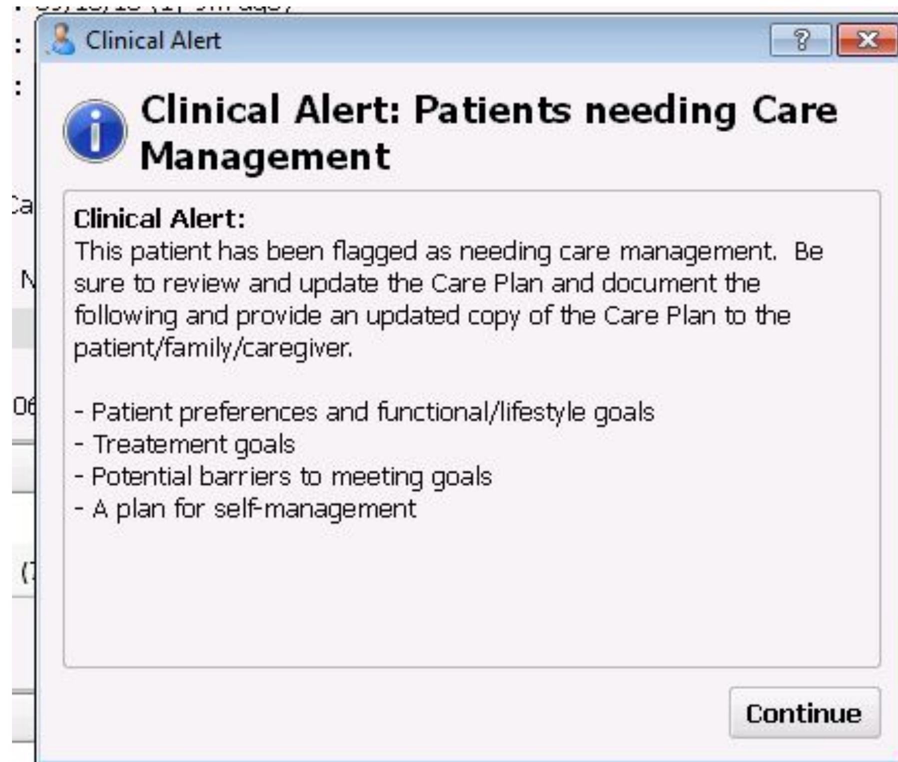
- Use recaller or new EHR Patient Lists to monitor population of kids needing care management

UC Denver 2018

PCC Pediatric EHR Solutions

Care Management and Support

- Use clinical alert in EHR to remind about updating Care Plan



UC Denver 2018

PCC Pediatric EHR Solutions

Care Management and Support

CM 04 (Core): Establishes a person-centered care plan for patients identified for care management.

Goals

- Asthma Action Plan

Actions

- Management of compliance with medication regimen
- Asthma management

Next Steps

Pebbles was shown at her last visit how to use her inhaler and she has been carrying it with her during basketball practice and games. She hasn't had an attack during a game in the last three weeks.

Care Coordination Notes (internal use)

Pebbles has done very well being compliant with her new inhaler and it has decreased the number of attacks she has had in the last few months. We will continue with regular follow up appointments for the next year

If you add the Care Plan component to chart notes, you can review, update, print, and mark interventions as reviewed during a visit

- Use PCC's Care Plan component
- Use EHR Report "Care Plans by Date" to identify all patients with a Care Plan

UC Denver 2018

PCC Pediatric EHR Solutions

Care Management and Support

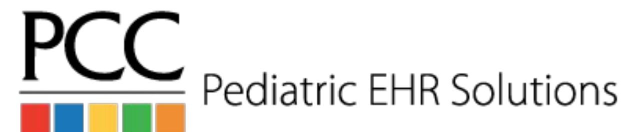
CM05 (Core): Provides a written care plan to the patient/family/caregiver for patients identified for care management

CM06 (1 Credit): Documents patient preference and functional/lifestyle goals in individualized care plans

CM07 (1 Credit): Identifies and discusses potential barriers to meeting goals in individual care plans

CM08 (1 Credit): Includes a self-management plan in individual care plans

- Use Record Review Workbook
- Renewals: Reports and examples not required



Care Coordination and Care Transitions

CC 01 (Core): The practice systematically manages lab and imaging tests by:

A. Tracking lab tests until results are available, flagging and following up on overdue results.
B. Tracking imaging tests until results are available, flagging and following up on overdue results.
C. Flagging abnormal lab results, bringing them to the attention of the clinician.
D. Flagging abnormal imaging results, bringing them to the attention of the clinician.
E. Notifying patients/families/caregivers of normal lab and imaging test results.
F. Notifying patients/families/caregivers of abnormal lab and imaging test results.

- PCC has autocredit for CC01.A-D
- Documented process and evidence of implementation required for factors without autocredit

Referral Tracking and Follow-up

CC 04 (Core): The practice systematically manages referrals by:

A. Giving the consultant or specialist the clinical question, the required timing and the type of referral.
B. Giving the consultant or specialist pertinent demographic and clinical data, including test results and the current care plan.
C. Tracking referrals until the consultant or specialist's report is available, flagging and following up on overdue reports.

- Documented process and evidence of implementation required
- Use Visit Summary report or Summary of Care Record to send to specialist

Tracking and Following Up on Referrals

Care Plan Print Display: All Statuses

04/08/14 Status: Active

Goals

- Transition to adult care setting

Actions

- Transfer practice

Next Steps

1. Identify adult primary care
2. Identify adult emergency care
3. Identify specialty care needs
4. Obtain release for transfer of records to adult care
5. Provide health information summary to adult care practice

Care Coordination Notes (internal use)

Beau will be transitioning to Westwood Family Practice in Portland. His emergency and hospital care will be provided by Bay Area Medical Center. Beau has seen a neurologist in the past to help manage severe migraines he was having, but this issue seems to be resolved based on recent visits I've had with him. See attached intervention re: migraine care plan. Release for transfer of records is attached and a health info summary is being sent to Westwood Family Practice.

Team Members

General (1 Page) **Date: 04/08/14**

Note: Release form for transfer of records [pcc]

Attached to: 04/08/14 - Care Plan Goal "Transition to adult care setting"

EDIT TAGS VIEW DOCUMENT

These are the 5 standard steps for the practice to complete when transitioning a patient to adult care

Notes are recorded by the clinician identifying relevant history and progress on the above steps. These notes will print to be sent along to the adult care practice

A signed authorization form for records release can be attached to the Care Plan and printed with everything else.

Electronic Exchange of Information

CC 21 (*Maximum* 3 Credits): Demonstrates electronic exchange of information with external entities, agencies and registries (May select one or more):

A. Regional health information organization or other health information exchange source that enhances the practice's ability to manage complex patients. (1 Credit)
B. Immunization registries or immunization information systems. (1 Credit)
C. Summary of care record to another provider or care facility for care transitions. (1 Credit)

- Participation with Immunization Registry meets CC21.B
- Use Direct Secure Messaging for CC21.C
- Renewals: Evidence not required

Patient Centered Medical Home (PCMH) Measures

This dashboard page contains all of the PCC Practice Vitals Dashboard measures that relate to NCQA's 2014 PCMH standards. This page can be used to monitor your performance toward meeting specific elements and factors. You can also print this page to share the data with staff and providers and for submission to NCQA as part of your application for PCMH recogntion. Visit PCC's PCMH WIKI page for screenshots, documentation, and other information about how PCC tools can help you meet various PCMH elements.

Element 1A: Patient-Centered Appointment Access

The practice has a written process and defined standards for providing access to appointments, and regularly assesses its performance.

Reporting period includes appointments from 7/1/2016 to 6/30/2017

Factor 1A.5 - Monitoring No-Show Rates

Measure	Total Appointments	Missed Appointments	% Missed	% Change (3 mo.)
Missed Appointment Rate	13,127	409	3.1%	1.0% ↑

Element 6A: Measure Clinical Quality Performance

The practice reviews its performance on a range of measures to help understand its care delivery system's strengths and opportunities for improvement. Although some measures may fit into multiple categories appropriately, each measure may be used only once for this element. When it selects measures of performance, the practice indicates the following for each measure: period of measurement, number of patients represented by the date, and rate (percent) based on a numerator and denominator.

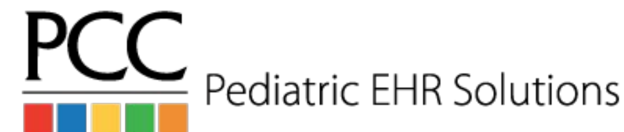
Reporting period includes active patients as of 7/2/2017

Factor 6A.1 - At least two immunization measures

Measure	Qualifying Patients	Up-to-Date Patients	% Up-to-Date	% Change (3 mo.)
Immunization Rates - HPV	839	564	67%	-0.3% ↓
Immunization Rates - Influenza *	2,900	1,842	64%	Insufficient Data
Immunization Rates - Influenza (Asthma) *	425	314	74%	Insufficient Data
Immunization Rates - Meningococcal	839	813	97%	0.8% ↑
Immunization Rates - Patients 2 Years Old	160	145	91%	3.2% ↑
Immunization Rates - Tdap	839	823	98%	-0.2% ↓

* Influenza rates are seasonal. This measure represents patients vaccinated since July 1. The percent change is compared to the same month last year.

- PCMH page updated and replaced monthly
- Log your measure results monthly, including # patients



Monitor Resource Measures

QI 02 (Core): Monitors at least two measures of resource stewardship (must monitor at least 1 measure of each type):

A. Measures related to care coordination.

B. Measures affecting health care costs.

- Report is required
- Use "Medication Reconciliation" MU measure report for QI 02.A
- For QI02.B - Custom srs report showing after-hours visits seen for complex patients (who would have otherwise likely gone to the ER)
- PCC eRx – Generic vs Brand Rx
- PCC eRx - Utilization of non-formulary medications

Provider -1	2	1	50%

- Includes provider breakdown for the following measures: ADD/ADHD Patient Followup, Developmental Screening Rates, Well Visit Rates, and Influenza vaccination for asthma patients

Reporting CQM data to Medicaid

QI 18 (2 Credits) - Reports clinical quality measures to Medicare or Medicaid agency

- If reporting CQMs with MU application, you get credit
- If not doing MU, contact Medicaid to see if they'll accept your CQMs
- Evidence of submission is required

Review of PCC's PCMH Resources

PCC PCMH Resources

http://pcmh.pcc.com

- Documentation and examples of relevant PCC reports and functionality related to 2017 standards

- Also includes other NCQA resources

- PCC Prevalidation
  - Contact PCC for "Letter of Product Implementation"
