

Pediatric Unspecified ICD-10 Codes

This list is provided in response to requests for a reference that identifies common pediatric ICD-10 codes for which using the Unspecified version could be defensible. The details required to further define these Unspecifieds are those not necessarily available at the time of a Pediatric office visit. This is NOT an exhaustive list. It represents those codes which we have encountered in our preparation and discussions. *When you have more detail, document and code it.* These codes exist for cases where you cannot know the missing details which would lead you to select a more specific code.

B27.90 Infectious mono, unspec	J18.8 Other pneumonia, unspec organism
E84 Cystic fibrosis, unspec	J18.9 Pneumonia, unspec organism
F32 Depressive disorder, unspec	J20.9 Acute bronchitis unspec
G47.30 Apnea, sleep, unspec	K52.9 Gastroenteritis, noninf, unspec
G80.9 Cerebral palsy unspec	K59.00 Constipation, unspec
