 - Telemedicine
 - Moderate Sedation

Oct 2016 AAP Coding Newsletter

- CPT Changes for 2017 Effective 1/1/17
 - Influenza changes
 - Age basis going away
 - Dosage to be included
 - Subspecialty Corner - Laryngoplasty

Your Questions

Q1:
Practice planning to administer flu shots at a local daycare facility. Which Place of Service is appropriate?

A1:
Depends upon the purpose of the facility

Places of Service

- 03 - School: A facility whose primary purpose is education
- 60 - Mass Immunization Center: A location where providers administer pneumococcal pneumonia and influenza virus vaccinations and submit these services as electronic media claims, paper claims, or using the roster billing method. This generally takes place in a mass immunization setting, such as, a public health center, pharmacy, or mall but may include a physician office setting.

Your Questions

"The ceftriaxone supply we use 500mg but the only HCPCS code we can find is J0696 for 250mg. Is there a better code to use for this?"

HCPCS

Free HCPCS lookup:

<http://www.icd9data.com/HCPCS/2016/default.htm>

J0696 Injection, ceftriaxone sodium, *per 250 mg*

- Base unit must be multiplied by 2 for proper billing
- Pay close attention to NDC codes

HCPCS

Google brand names to get search terms

Lorazepam ⓘ
Brand name: Ativan

Sedative
It can treat seizure disorders, such as epilepsy. It can also be used before surgery and medical procedures to relieve anxiety.

Controlled substance More info
Can cause paranoid or suicidal ideation and impair memory, judgment, and coordination. Combining with other substances, particularly alcohol, can slow breathing and possibly lead to death.

What Questions Do You Have?
