

2015-Edition Certification Development Preview

Tim Proctor (tim@pcc.com)
Users Conference 2019

Promoting Interoperability (PI) Portfolio Project

- PCC is working to obtain current EHR certification (2015-edition)
- PCC will be testing the relevant functionality with Drummond Group - an Authorized Certification Body (ACB)

PI Project Team

Project Manager: Tim Proctor

Project Team: Dan Gillette, Jen Marsala,
Tamsin Laflam, Jim Smith, Sue Clark, Justin
Ballou, Spencer March

Agenda

- PI program eligibility in 2019 and beyond
- High-level overview of upcoming development related to 2015-edition certification
- Feedback opportunity

Medicaid Incentive Program Eligibility

- Must be an “Eligible Professional” (EP)
 - Physicians (M.D., D.O.)
 - Nurse practitioners
- PAs not eligible
- Maximum 6 years of eligibility

Medicaid Incentive Program

- PCC EHR is currently 2014-edition certified
- Stage 3 reporting and 2015-edition certified EHR product is required starting in 2019 program year
- Incentive program is expected to expire after 2021

ONC Proposed Changes

- ONC has recently proposed changes to 2015-edition certification criteria.
- These changes are expected to be finalized in Fall 2019 and will define requirements for 2020 and beyond
- PCC is anxiously awaiting these finalized changes which will include:
 - Updated criteria
 - Updated testing protocols
 - Voluntary certification of health IT for pediatric care

ONC Proposed Pediatric Recommendations

ONC RECOMMENDATIONS FOR PEDIATRIC HEALTH IT VOLUNTARY CERTIFICATION CRITERIA

1. Use biometric-specific norms for growth curves and support growth charts for children
2. Compute weight-based drug dosage
3. Ability to document all guardians and caregivers
4. Segmented access to information
5. Synchronize immunization histories with registries
6. Age- and weight-specific single dose range checking
7. Transferrable access authority
8. Associate mother's demographics with newborn
9. Track incomplete preventative care opportunities
10. Flag special health care needs

ONC CERTIFICATION CRITERIA TO SUPPORT PEDIATRIC CARE AND PRACTICE SETTINGS

- ONC proposed ten recommendations for the voluntary certification of health IT for pediatric care
- More details about these criteria are expected in the final ruling to be released this Fall

2015E High-Level Deliverables

Clinical

- Demographics
- Implantable Device List

Patient Engagement

- Patient API

Care Coordination

- Direct Secure Messaging Updates
- CCD v2.1 updates
- Data exports

Privacy / Security

- Updates to logging and reporting of auditable events

CQMs

- New and updated pediatric measures
- QRDA updates

Public Health

- Bi-directional Imms Registry
- Syndromic Surveillance Registry

2015E Development

Clinical

- Demographics
 - Implantable Device List
-
- Tracking sexual orientation and gender identity
 - Additional race and ethnicity options
 - Tracking Unique Device Identifiers (UDIs) associated with a patient's implantable devices (i.e., pacemakers, cochlear implants, insulin pumps)

2015E High-Level Deliverables

Care Coordination

- CCDA v2.1 update
- Data exports
- Direct Secure Messaging Updates

- Update to new version for Continuity of Care Document (CCDA), including parsing and validating
- Allow for expanded CCDA data export capabilities
 - Specified date range
- Updated back-end formatting for Direct Secure Messages

2015E High-Level Deliverables

CQMs

- Updated pediatric measures and value sets
- QRDA version updates

- Updates to pediatric Clinical Quality Measures and value sets
- Updates to CQM export format (QRDA) and content

CQMs

Here are some other pediatric CQMs that PCC will consider adding (in addition to updating existing CQMs):

- Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment
- Closing the Referral Loop: Receipt of Specialist Report
- Maternal Depression Screening
- Preventive Care and Screening: Influenza Immunization
- Children receiving fluoride varnish

Which of these measures are most relevant for you?

2015E High-Level Deliverables

Public Health

- Bi-directional Imms Registry
- Syndromic Surveillance Registry

- Bi-directional imms registry capability will be coming in 2020
- PCC plans to test for at least one additional public health reporting objective:
 - Syndromic surveillance registry
 - Cancer registry
 - Reporting to other public health agencies

2015E High-Level Deliverables

Patient Engagement

- Patient API
- Patient portal view, download, and transmit updates

- Patient API
 - Allowing patients to have access to their own health data using the application of their choosing
 - Example: patients may wish to import data into their Apple Health app from their iPhone
- Patients can email summary of care via patient portal (in addition to sending via DSM)

2015E High-Level Deliverables

Privacy / Security

- Updates to logging and reporting of auditable events
- Includes logging and reporting of user admin changes (new users, disabled users, role changes, etc)

Stay Tuned....

- Look for updates on PCC Community about PCC's 2015E certification status

Thank you!
