PCC
Pediatric EHR Solutions

Agenda

- Intro to PCC Dashboard
- PCC Dashboard features
- Live demo
  - New COVID-19 Dashboard
  - Review of various Dashboard measures

UC 2020 Burlington, Vermont

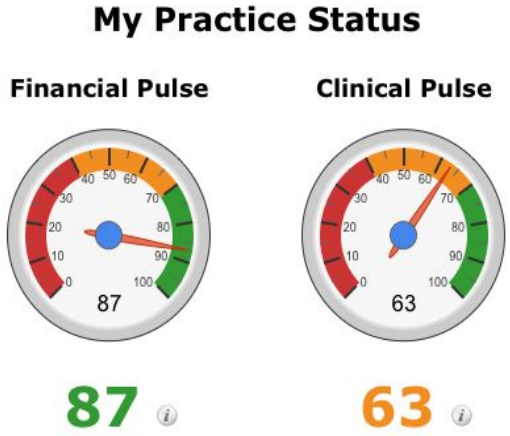
PCC Pediatric EHR Solutions

Session Goals

1. Recognize how the PCC Dashboard has helped many practices measure and improve their practice performance
2. Identification of opportunities for improvement for your practice
3. See how you measure up to other PCC practices

PCC Dashboard

"...a tool to inform all PCC clients of their financial and clinical health, based on relative performance in a variety of areas."



UC 2020

Measure, Take Action, Measure Again!

20 PCC practices with most usage (# logins in past year):

- Tiger Pediatrics (468)
- Cary Pediatrics (419)
- Farmington Pediatrics and Adolescent Medicine (400)
- Laramie Pediatrics (375)
- Bay Street Pediatrics (366)
- Village Pediatrics (304)
- Pediatrics in Brevard (303)
- BCD Health Partners (263)
- East Portland Pediatric Clinic (254)
- Pediatric Associates (South Sound) (250)
- All Starr Pediatrics (249)
- Lamorinda Pediatrics (243)
- Sandhills Pediatrics (NC) (237)
- Eden Park Pediatrics (231)
- North Seattle Pediatrics (229)
- El Paso Pediatrics (228)
- Middletown Pediatrics (226)
- Lighthouse Pediatrics of Naples (217)
- Westside Pediatrics (210)
- Frank J. Bush, MD (203)

AVG Pulse Scores for these practices:

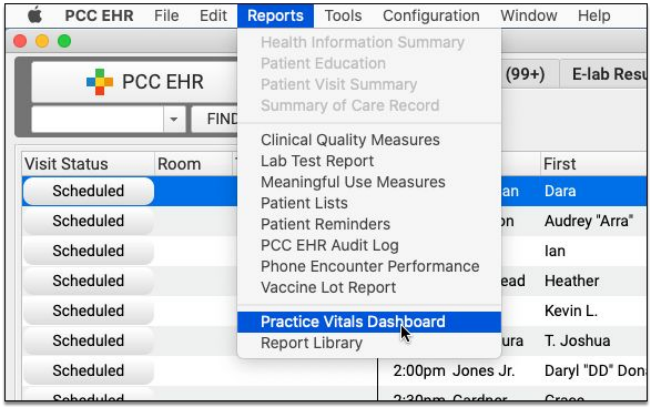
Financial Pulse: 77 (77th percentile)
Clinical Pulse: 74 (76th percentile)

UC 2020 Burlington, Vermont

PCC Pediatric EHR Solutions

Dashboard Logins and Data

- One login for each practice
- Data collected on the first Saturday of every month. Loaded into production a few days after that
- Pediatric-specific benchmarks



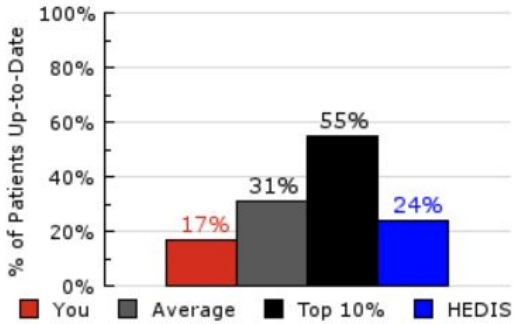
UC 2020 Burlington, Vermont

PCC Pediatric EHR Solutions

Benchmarks

- PCC AVG and "Top Performers" (90th percentile)
- HEDIS benchmarks

How You Compare



Your Practice	PCC Client Average	Top Performers	HEDIS® Commercial HMO
17%	31%	55%	24%

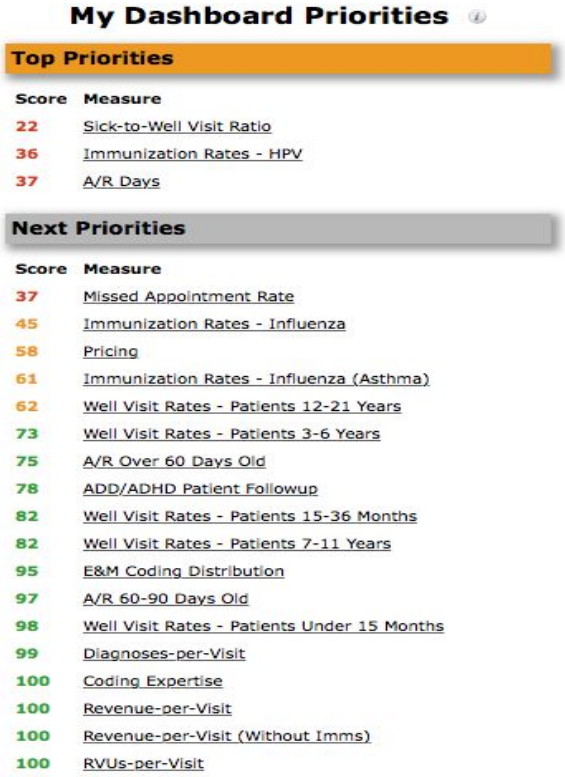
(% of active patients 13 years old up-to-date)

UC 2020 Burlington, Vermont

PCC Pediatric EHR Solutions

Dashboard Scoring

- Over 20 measures are calculated and scored based on your relative performance
- Prioritized list of results on home page



Dashboard Scoring

- For each measure, PCC defines the values that correspond to a score of 0 and 100
- For each measure, your score is based on:
  - How far your measure value is from the “zero-score” measure value
  - The variance between “zero-score” and “100-score” measure values

Location Adjustments

- Apply to Revenue-per-Visit, RVU-per-Visit, and Pricing measures
- Allows for comparison to benchmark regardless of practice geographic location
- Uses current RVU geographic practice cost index (GPCI) values for your location
- Relatively high cost-of-living and malpractice expense = negative adjustment
- Relatively low cost-of-living and malpractice expense = positive adjustment

Provider Breakdown

For some measures, there are additional breakdowns by provider (typically PCP).

Detailed Breakdown: Primary Care Provider

Show Breakdown By: Primary Care Provider

Primary Care Provider	Active Patients	Overdue Patients	Up-to-Date Patients	% Patients Up-to-Date
All Providers	477	99	378	79%
Provider 2	281	70	211	75%
Provider 6	45	9	36	80%
Provider 9	51	4	47	92%
Provider 21	4	1	3	75%
Provider 5	3	1	2	67%
Provider 3	37	8	29	78%
Provider 18	10	1	9	90%
Provider 28	2	0	2	100%
Provider 13	44	5	39	89%

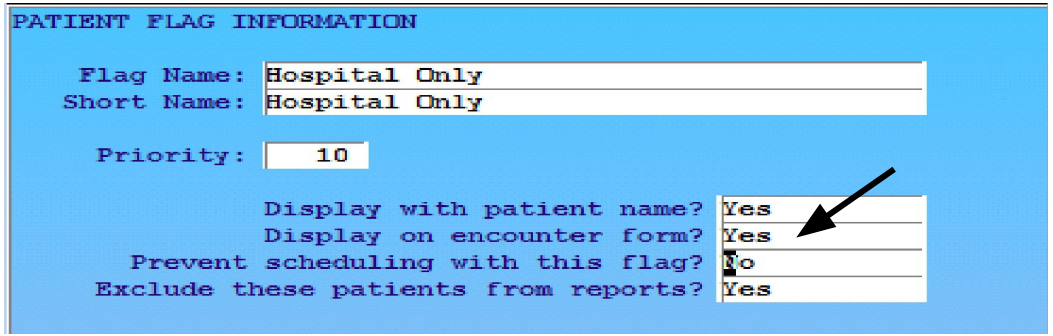
PCC Pediatric EHR Solutions

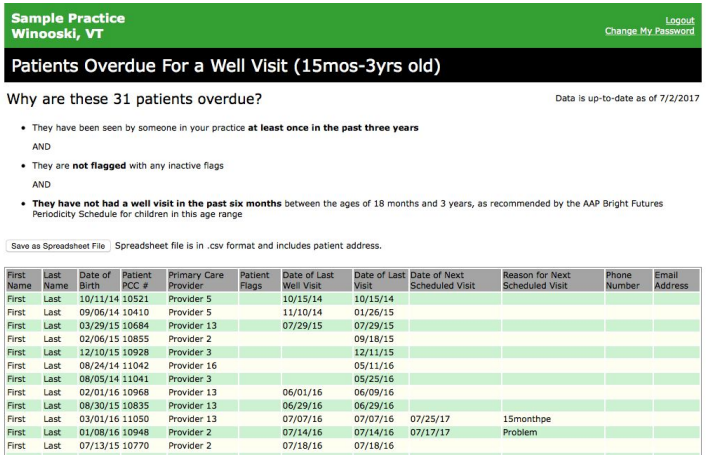
Maintaining Patient Flags

- Patients with certain flags are excluded from Dashboard clinical measures and overdue lists
- Review patient and account flags table. If the last question, “Exclude these patients from reports” is set to “Yes”, then patients with these flags are excluded from PCC Dashboard clinical measures



Maintaining Patient Flags

- Be sure to routinely flag patients who shouldn't be included on your reports (Hospital Only, Transferred, etc)
- Monitor using Dashboard overdue lists



Sample Practice
Winooski, VT

Patients Overdue For a Well Visit (15mos-3yrs old)

Why are these 31 patients overdue?

Data is up-to-date as of 7/2/2017

- They have been seen by someone in your practice **at least once in the past three years**

  AND

- They are **not flagged** with any inactive flags

  AND

- **They have not had a well visit in the past six months** between the ages of 18 months and 3 years, as recommended by the AAP Bright Futures Periodicity Schedule for children in this age range

Save as Spreadsheet File Spreadsheet file is in .csv format and includes patient address.

First Name	Last Name	Date of Birth	Patient PCC #	Primary Care Provider	Patient Flags	Date of Last Well Visit	Date of Last Visit	Date of Next Scheduled Visit	Reason for Next Scheduled Visit	Phone Number	Email Address

Monitor Measure Trends

- Review monthly trends for each Dashboard measure
- Download as .csv

Trend: History of Your Values

Trend information can be helpful in uncovering the reason for your performance. For this measure, an upward trend indicates that you are improving and a downward trend indicates your performance with this measure is getting worse. For new practices, it is perfectly normal to see volatile results for some measures for the first 6-8 months after go-live.

Save trend output as .csv (spreadsheet) file

PCC Pediatric EHR Solutions

Review Recommendations

For each measure, explanations and guidance are provided

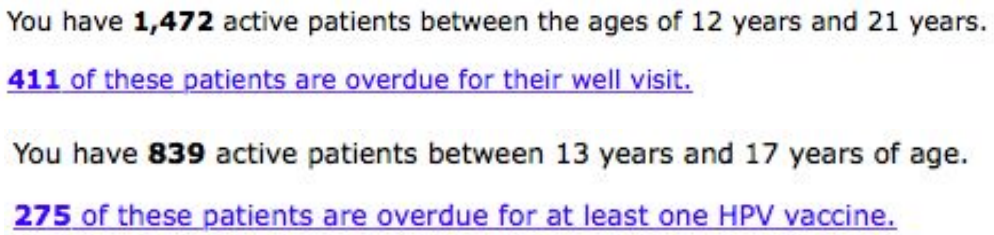
Recommendations

PCC's recaller tool can help identify patients who are due for a flu vaccination. In addition to excluding patients with certain inactive flags, you can exclude by procedure to leave out patients who have already received a flu vaccination this season. You can also exclude by appointment to leave out patients who are scheduled for an upcoming flu vaccination appointment. PCC's notify tool can automatically call, email, or text patients on this list letting them know about upcoming flu clinics or appointment availability.

Consider setting up a flu clinic to immunize your patient population quickly and efficiently. Refer to PCC's recommendations on setting up a flu clinic to discover best practices for using PCC software appropriately based on your workflow.

If you are considering achieving PCMH Recognition with NCQA, keep in mind that this measure is a relevant preventive care service and you can use Dashboard screen shots to show you are tracking this data regularly. Refer to PCC's PCMH WIKI for details on how to use Partner and PCC EHR tools to achieve PCMH Recognition.

Identify Recall Opportunities



- Use PCC's notify, recall, and EHR reporting tools to identify patients in need of:
  - Well visits
  - Vaccinations
  - Screenings
  - Chronic Disease Management

UC 2020 Burlington, Vermont

Related Tools

- Related Tools section in bottom right of each measure detail page
- Additional benchmarks, provider breakdowns, and other related analyses

Use for PCMH Recognition

QI 01 (Core) – Clinical Quality Measurement

To understand current performance and to identify opportunities for improvement, the practice monitors clinical quality measurement. When it selects measures of performance, the practice indicates the following for each measure: period of measurement, number of patients represented by the date, and rate (percent) based on a numerator and denominator.

Choose at least five clinical quality measures across the four categories (A-D) listed below. You must monitor at least one measure of each category, and you cannot use the same measure for different categories.

Reporting period includes active patients as of 6/1/2019

A. Immunization Measures

Measure	Qualifying Patients	Up-to-Date Patients	% Up-to-Date	% Change (3 mo.)
Immunization Rates - Adolescents	254	51	20%	Insufficient Data
Immunization Rates - HPV (Patients 13-17 Years)	1,119	651	58%	-2.8% ↓
Immunization Rates - HPV (Patients 13 Years)	254	92	36%	-5.0% ↓
Immunization Rates - Influenza *	4,741	3,093	65%	0.6% ↑
Immunization Rates - Influenza (Asthma) *	451	301	67%	-4.3% ↓
Immunization Rates - Meningococcal	1,119	1,088	97%	0.2% ↑
Immunization Rates - Patients 2 Years Old	317	241	76%	-0.1% ↓
Immunization Rates - Tdap	1,119	1,080	97%	0.7% ↑

* Influenza rates are seasonal. This measure represents patients vaccinated since July 1. The percent change is compared to the same month last year.

QI 05 (1 Credit) Health Disparities Assessment

The practice assesses health disparities using performance data stratified for vulnerable populations. You must choose one clinical quality and one patient experience measure. Use the menus below to stratify one clinical quality measure for a selected vulnerable population.

Reporting period includes active patients as of 6/1/2019

Performance data stratified for vulnerable populations

Measure: ADD/ADHD Patient Followup

Breakdown By: Ethnicity

ADD/ADHD Patient Followup			
Ethnicity	**Qualifying Patients**	**Up-to-Date Patients**	**% Up-to-Date**
None Selected	12	8	67%
Hispanic or Latino	25	18	72%
Not Hispanic or Latino	243	164	67%
Prefers not to answer	13	10	77%

QI 10 (Core) Setting goals and taking action to improve appointment availability

Practices may select no-show rates as an area of focus for improving patient access. You may also want to consider monitoring no-show rates as a health care costs measure (resource stewardship measure) relevant to PCMH element QI02-B.

The reporting period for this measure includes appointments from 3/1/2019 to 5/31/2019

Measure	Total Appointments	Missed Appointments	% Missed	% Change (3 mo.)
Missed Appointment Rate	5,272	112	2.1%	0.0% ↑

QI 15 (Core) Reporting Performance within the Practice

The practice provides individual clinician or practice-level reports to clinicians and practice staff. Performance results reflect care provided to all patients in the practice (relevant to the measure), not only to patients covered by a specific payer. Select a measure from the menu below to see clinician-level reporting, broken down by primary care provider:

Reporting period includes active patients as of 6/1/2019

Performance data stratified for individual clinicians

Measure: ADD/ADHD Patient Followup
