 - A) edit prescription and send back to original pharmacy
 - B) switch to a different pharmacy
- ❁ Will automatically delete original rx > send cancellation to the pharmacy > display history in Review & Sign
- ❁ Subsequent Rx will also show option to Resend
- ❁ Only available for 7 days!

Resend:
Only when you want to!

PCC eRx: A Year in Review

Other Important Improvements & Bug Fixes

- ❁ **Minimum commercial package size suggested for liquids and drops**
- ❁ **Only show safety alerts for *active* diagnoses and medications**
- ❁ **Off-market medications? No Problem!**
- ❁ **No more trouble with Patient Takes No Medications button**
- ❁ **Ordering Provider saves and sends properly for all prescriptions**
- ❁ **Weight-based Dosing for Augmentin & Bactrim - fixed (again!)**

Additional Improvements & Bug Fixes - PCC eRx

- ❁ Improved logic and display when you delete a prescription or discontinue a medication
- ❁ Edits to historic medications carry over when you renew with the blue swish
- ❁ Dispense quantity carried forward as expected with renewed entries
- ❁ Improved logic to decide when a unique row gets created in Medication History in PCC eRx
- ❁ Better handling of stop dates and auto-expiration in PCC eRx and PCC EHR
- ❁ Fewer opportunities for Start Date errors on new prescriptions
- ❁ One-time only prescriptions automatically become inactive after one day in Medication History
- ❁ Clearer view into prescribing activity on an eRx encounter with improved Reconciliation History
- ❁ See patient instructions when viewing prescriptions linked to a historic medication

Additional Improvements & Bug Fixes - PCC eRx

✿ Controlled Substances & EPCS:

- Prescribe controlled substances without running into *unexpected* future stop date or days supply limit errors
- Identify 3-month supply prescriptions at-a-glance in Medication History with a "3 month supply" label
- DEA number now correctly displays on printed prescriptions

✿ Assorted Favorites Issues:

- Deleting a favorite from My Settings yielded an endless deleting experience
- Favorites saved with custom dispense quantities not respected at time of prescribing
- Asynchronous error when creating a favorite from a Pending Rx
- Favorites: 3 month supply & DAW status now properly display

Additional Improvements & Bug Fixes - PCC eRx

- ❁ Practice location zip code accurately used in pharmacy search
- ❁ Create custom search terms for your preferred nebulizers, medications, and more
- ❁ Various logs incorrectly displayed “ampoule” as unit of measure instead of intended designation of ‘each’
- ❁ Removed access for Non-Clinical staff to be able to renew prescriptions w/ blue swish
- ❁ Utilize smarter dispense quantity logic on prescriptions that reference “both” eyes, ears, or nostrils
- ❁ Transmit more appropriate NDC’s for brand and generic prescriptions
- ❁ Say goodbye to issues with Albuterol HFA inhalers
- ❁ Improper truncation of dispense quantity at the decimal value (think: albuterol inhalers)

Popular Wishes & Enhancement Requests for PCC eRx

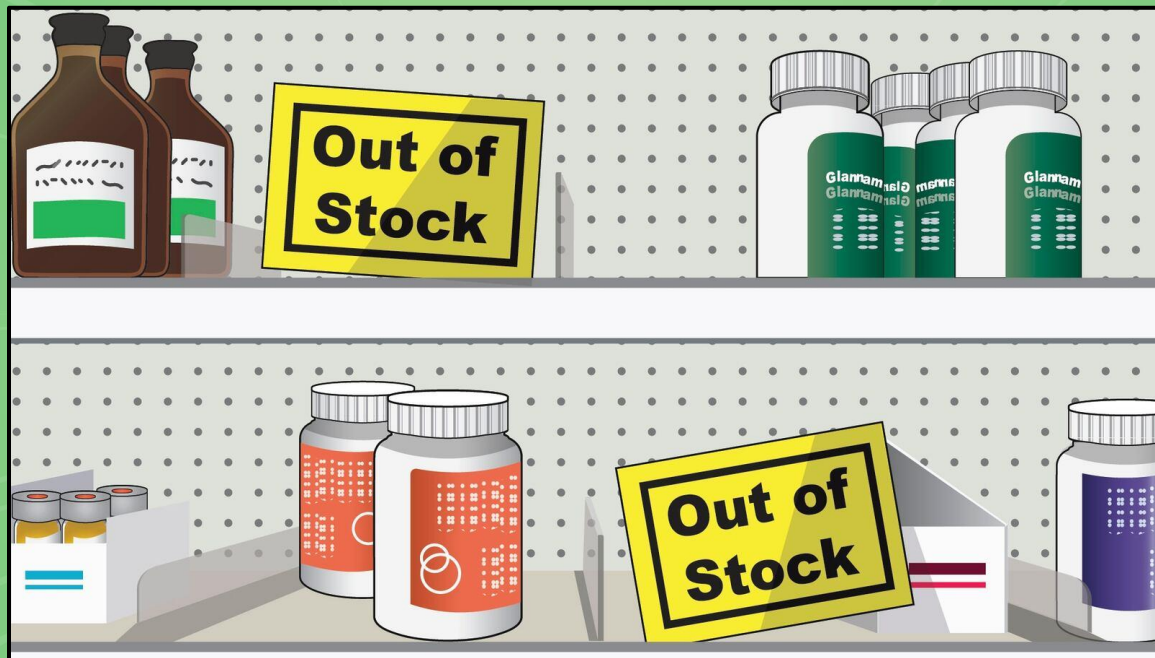

Popular Wishes & Enhancement Requests for PCC eRx

- ❁ Integrate state-specific prescription drug monitoring programs (PDMPs)
- ❁ Include “pending” option so non-providers can utilize the resend functionality
- ❁ Add extra flexibility for resending individual months within a 3 month supply
- ❁ Give users the option to resend from other locations in PCC eRx
- ❁ Ability to mark medications as confidential to control where and when they will display
- ❁ Implement snap text capability inside PCC eRx
- ❁ Build configuration options to allow for flexibility with package size vs # mL

PCC eRx Tips and Tricks

“Sometimes it feels like *every* medication is on backorder!”

View known drug shortages, here:
